

# PANDALIME — PROJECT ABSTRACT

AI Resume Scanner, Portfolio Builder & Career Suite • [pandalime.com](https://pandalime.com)

Executive Summary  
Host: Render • DB: Neon PostgreSQL

## 1. What is PandaLime? (In Simple Words)

**PandaLime** ([pandalime.com](https://pandalime.com)) is a free website built to solve a major issue in job hunting: **Applicant Tracking Systems (ATS)**. Over 90% of companies use software to filter resumes before human recruiters ever see them. If a resume misses key skills or uses bad formatting, it gets rejected automatically. PandaLime gives job seekers a 100% free solution: (1) an **AI Resume Scanner** that reviews and fixes resumes against job postings in 3 seconds, and (2) an **AI Portfolio Builder** that turns resume details into a live personal website in 1 click.

|                                                                                     |                                                                                    |                                                                            |

## 2. How Resume Scanning Works (Step-by-Step)

|                                                                                                                       |                                                                                                                      |
|-----------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>1. Upload &amp; Extract:</b> User uploads resume PDF and pastes a job description. Clean text is extracted safely. | <b>2. File Safety Check:</b> Server verifies binary magic bytes (%PDF-) to ensure the file is safe.                  |
| <b>3. AI Comparison:</b> Google Gemini AI checks skills, tools, and experience against the job requirements.          | <b>4. Instant Score:</b> Returns an <b>ATS Score (0–100)</b> , missing keywords, and Google X-Y-Z rewritten bullets. |

## 3. AI Portfolio Builder Feature (Live Personal Website)

The built-in **AI Portfolio Builder** turns resume details into a clean, modern personal website in 1 click. Each user gets a live shareable URL (such as [pandalime.com/p/username](https://pandalime.com/p/username)) with interactive project showcases, live demo links, tech skill badges, work timeline, social links, downloadable resume, and instant theme switching (Terminal, Minimal, Dark). All portfolios and profile data are securely stored in serverless **Neon PostgreSQL DB** for instant global loading.

## 4. Technologies Used Across the Platform

| Layer            | Technology                 | What It Does (In Simple Words)                                                         |
|------------------|----------------------------|----------------------------------------------------------------------------------------|
| Frontend (UI)    | React 18 + Vite + Tailwind | Ultra-fast, responsive user interface hosted on Render for smooth mobile/desktop use.  |
| Backend Server   | Node.js + Express (Render) | Handles file uploads, validates PDF magic bytes, coordinates AI, and serves REST APIs. |
| Database         | Neon DB (PostgreSQL)       | Serverless PostgreSQL storing user accounts, saved scan reports, and live portfolios.  |
| AI Engine        | Google Gemini AI           | Reads resumes like a senior recruiter, finding skill gaps and rewriting bullet points. |
| Hosting & Cloud  | Render Cloud Platform      | Hosts frontend web apps and backend services with global SSL and automatic deploys.    |
| Speed & Security | SSG + HMAC CAPTCHA         | 235+ pre-rendered static pages + rate limiters to block bots and load in milliseconds. |

## 5. Additional Free Tools & Summary

|                                                                                                                                                                                                                         |                                                                                                                                                                                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>• <b>STAR Bullet Generator:</b> Converts tasks into quantified achievements.</li><li>• <b>250+ ATS Action Verbs:</b> Categorized power words for tech &amp; leadership.</li></ul> | <ul style="list-style-type: none"><li>• <b>Job Keyword Extractor:</b> Isolates required hard skills from job postings.</li><li>• <b>6 Regional Portals:</b> Localized in Hindi, Tamil, Telugu, Kannada, Marathi, Bengali.</li></ul> |
